

Unit Convertor

With your knowledge gained on JavaScript concepts prepare a code to design a unit converter converting feet to cm producing the below output.

Hint

- The feet value to be converted should be entered in a text box.
- Convert to cm action will happen in the form submit action of the button.
- If the feet value entered is less than 0, then the “Please enter a feet value > 0” message should be displayed.
- If a non-numerical value is entered, then the “Please enter a valid number!” message should be displayed.

Process for Submission

Please share your assignment files via this [Google Form](#) before the deadline (13th May, 2022 11:59 pm).

Steps to submit the assignment:

1. Login to your github account.
2. Create a repository(remote) in github.

Owner * / Repository name *

Great repository names are short, lowercase, and contain only alphanumeric characters and hyphens. Your new repository will be created as `username/sturdy-barnacle?`

Description (optional)
This is my first website creation project

☒ Public
Anyone on the internet can see this repository. You choose who can commit.

☐ Private
You choose who can see and commit to this repository.

Initialize this repository with:
Skip this step if you're importing an existing repository.

☒ Add a README file
This is where you can write a long description for your project. [Learn more.](#)

☐ Add .gitignore
Choose which files not to track from a list of templates. [Learn more.](#)

☐ Choose a license
A license tells others what they can and can't do with your code. [Learn more.](#)

This will set `main` as the default branch. Change the default name in your [settings](#).

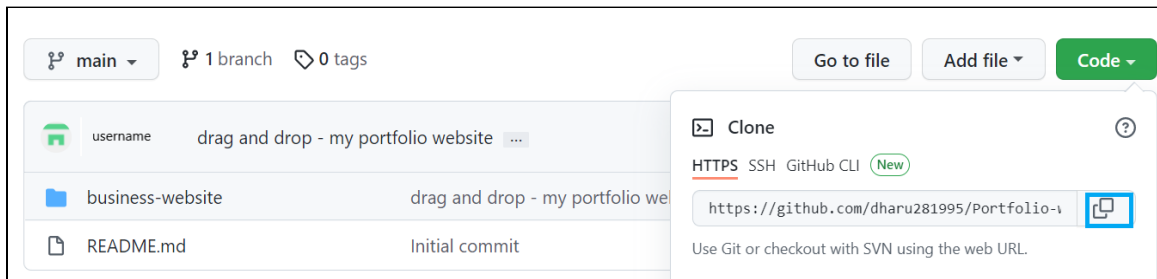

Create repository

3. Push your complete project folder to your git repository or you can upload files manually.

```
$ git push -u origin master
```

- Copy the shareable link.

- Open the [Google Form](#).
- Enter your email id, name.
- Select the name of the assignment.
- Add your project github link in the form.

Github Link *

Your answer

- Click on the submit button.
